

Mobile application for legal services on Android and iOS platforms.

 **Personal client account. Legal assistance — all in one app.**

Purpose of the solution

To create a convenient mobile digital tool for Android and iOS that will simplify access to legal services, ensure transparency of interaction, and give clients full control over their legal affairs.

Personal client account

Each user has access to a **personal account** with secure login and a full range of functions:

- Viewing history of requests
- Storage of legal documents
- Status and progress of current applications and requests
- Requesting consultations via the form
- Secure uploading and downloading of files

Clients are always up to date with their cases and documents — at any time, from anywhere in the world.

Legal services in digital format

The application allows clients to:

- Send requests for legal assistance.
- Attach documents to the case.
- Receive a response from a solicitor in their personal account
- Evaluate the outcome of the work.
- Receive notifications about deadlines and actions.

All actions taken by solicitors and clients are transparent and organised.

Digital document storage

Each client is provided with **personal encrypted storage** where they can:

- Upload and store contracts, deeds, court decisions and other materials.
- Search by document name or type.
- Save change history.

No more searching for documents in emails and folders — everything is at your fingertips.

Lawyer's admin panel

Lawyers get access to a separate admin panel where they can:

- Manage client requests.
- Assign case statuses.
- Upload responses and documents.
- Keep records and plan tasks.

The system optimises working time and eliminates paperwork.

Security and privacy

- All customer data is stored on the company's server.
- Data transmission is encrypted.
- Access is restricted only by authorized persons.
- Compliance with legal and industry standards of information protection.

Your legal information is in your hands only.

Simple and intuitive interface

- Modern and minimalistic design.
- Convenient navigation through sections.
- Support for Android and iOS.
- Customization for your law firm's brand.

Even the most complex processes become simple.

How the app works

1. The client installs the app and registers.
2. Gains access to the personal account.
3. Creates a request and uploads documents.
4. A lawyer processes the request and adds the result.
5. The client receives a notification and sees the response.

Who is this solution for

- Law firms.
- Private practicing lawyers.
- Corporate legal departments.
- Online lawyers and legal advisors.
- Legal aid and support centers.

Advantages

- Simplifies interaction with clients.
- Increases trust and transparency.
- Reduces request processing time.
- Increases client loyalty.
- Allows you to scale the legal business.

Unique features:

Every task is a complete information resource.

Every task is a complete information resource

Any publication can easily be turned into a structured reference book, service catalog, or internal documentation. With unlimited nesting levels, you can create:

- A catalog of legal services with prices and descriptions.
- A knowledge base for clients.
- Projects with step-by-step instructions and checklists.

Flexibility and control through access roles

Assign access rights based on tasks:

- Lawyers can only see their own cases.
- Managers control deadlines.
- Clients can only see information related to their task.
- Convenient collaboration with distribution of responsibilities and progress tracking.

Clients receive:

- Up-to-date information: see the status of the case, documents, deadlines.
- 24/7 access: they can ask a question, upload a file, or receive a notification.
- Personal experience: All in one place — no emails, calls or lost data.

Why does it work for you:

- Attracts customers through simplicity and transparency.
- Reduces the burden on the team — all processes are structured.
- Increases trust — the client feels controlled and supported.

Legal services in your pocket

It's not just an app — it's your **mobile digital office** and communication channel with the client in one solution. Nothing superfluous, just a clear, structured legal interaction.
