<https://highs.tech/>

**THERE ARE TWO COMMON WAYS OF CREATING MOBILE APPS:
DEVELOPMENT TO ORDER OR RENTING THE APP BUILDERS.**

WE'VE CREATED A THIRD SOLUTION...

PERSONAL "REZVOV MOBILE SOFTWARE" – YOUR DIGITAL WORLD IN YOUR POCKET!

Rezvov Mobile Software technology provides **complete digital independence** – from creating national social networks to niche business platforms for Android and iOS. The platform's architecture flexibly adapts to any scenario. The solution is protected by a patent and an **international PCT application**, confirming its uniqueness and opening up **opportunities for global licensing** and the formation of a new standard for digital sovereignty.

You get your own feature-rich native mobile app with a single point of entry and exceptional functionality for download to the App Store and Google Play without months of custom development.

On the customer's server is transferred: a proprietary unique native mobile applications of varying functional complexity to be uploaded to the App Store and Google Play, together with the management system. It is fully functional and ready to work, but do not contain information content. Adapted by the customer to specific requirements on his own server in one day.

- ✓ The transferred native mobile application with management system belongs only to the customer.
- ✓ This is not an app builder or a service with regular fees.
- ✓ Simple and easy to use control panel on your server.
- ✓ The interface can be customised to suit any customer's business processes.
- ✓ Data security is under the personal control of the owner of the mobile application: all information content is stored on the customer's server in the area of his personal responsibility.
- ✓ The ability to create social networks and marketplaces makes this innovative solution even more attractive to a wide range of stakeholders.

YOU NO LONGER NEED TO GO THROUGH ALL THE MANDATORY STAGES OF MOBILE APP DEVELOPMENT:

- | | | |
|------------------------------|----------------------------------|----------------------|
| ⚡ Specifications development | ⚡ Prototype development | ⚡ Design development |
| ⚡ Application Development | ⚡ Server side of the application | ⚡ Testing |
| ⚡ Technical support | ⚡ Project management | ⚡ Integrations |

LEONARDA is not another platform. It's an alternative: a way to build your own digital space – without subscriptions, third-party tools, or compromises.

We don't change the world. Just helping you stay independent in it!
