

Innovative educational mobile platform for remote education “Rezvov Mobile Software” for Android and iOS

INNOVATIVE EDUCATIONAL PLATFORM “Rezvov Mobile Software”

With multi-level educational posts and a built-in messenger. Education. Communication. Scaling.

One post = An entire course

- Create multi-level nested posts that combine lectures, assignments, tests, and discussions.
- Uncover topics step by step (lectures → assignments → tests)
- All materials are structured in a single branch: Instead of scattered files — a logical hierarchy of knowledge, like tree branches.

Imagine: instead of a hundred scattered files in the cloud — a single structure where the lecture, assignments, and discussions are linked in one post. Like tree branches.

Built-in messenger for learning

- Each educational post contains a built-in chat: for discussing the lecture, tasks, or getting feedback from the teacher.
- All communications take place in the context of a specific topic — it's convenient, clear, and effective.
- File sharing, voice messages, video chat within each educational post

All communication — inside the course structure. Without third-party messengers.

Appointment of assistants and curators

The teacher can assign assistants with flexible rights: editing, adding materials, moderation.

- Editing rights for each post
- Assistants add materials without restrictions

This allows dividing the course into roles: one delivers lectures, another — practice, a third — testing

Course structure visually

— Main post: “Python Course”

```
├─Lecture1
├─Assignment1
├─Test
├─Lecture2
├─Video
└─Group project
```

💡 *Every student and teacher sees the entire course structure at once — nothing gets lost.*

➤ **Information security**

All data is stored on the customer's server, including chats, materials, and login credentials.
No external clouds — complete control over confidentiality.

➤ **Mini-applications within the platform**

Create reference books, problem books, hints right in the course structure.

💡 *This replaces dozens of third-party services and saves time for students and teachers.*

➤ 📱 **Accessibility and offline mode**

Working without internet? No problem — the platform will continue to function offline.

💡 *Especially important for regions with unstable connections or corporate training in closed networks.*

➤ 🌐 **Localization and language adaptation**

The platform supports interfaces in different languages, including English, Arabic (in development) French, Spanish, Portuguese, and others.

You can create courses for different audiences in one system.

➤ **Suitable for all forms of education**

- ✓ Corporations: employee training, chats with trainers]
- ✓ Governments: national platforms and closed internal universities]
- ✓ Universities: courses, laboratories, assistant programs]

- Universities and colleges

Case: “30% of master's students started teaching their own courses as assistants”

- Corporations and HR departments

Case: “Bank trains 10,000 employees: chats + offline access to materials”

- Government programs♣

Case: “Creating a digital educational ecosystem without dependence on BigTech”

One tool — endless application scenarios.

How to start?

1. Install the platform in 1 day
2. Set up courses and access rights
3. Launch training
4. Launch is extremely simple — without developers and complex setup.

A revolution in distance education

This is not just an LMS. This is a new-generation mobile digital ecosystem for Android and iOS, where knowledge is structured, transmitted, and perfected.

💡 The Mobile Platform turns learning into a living, flexible, and scalable process.

Conclusion

The world of education is changing rapidly. Universities, colleges, companies, and government structures need future-proof solutions that must be obtained today. The time has come for a unified, flexible, and secure new-generation educational platform — one where knowledge is organized logically, communication is built-in by default, and management is under full control.

The educational ecosystem “Rezvov Mobile Software” is not just a system for courses. It is an infrastructure for the digital era of education.

With it you:

- ✓ Create full-fledged educational ecosystems for your tasks for Android and iOS
- ✓ Support teachers and students, even with weak internet
- ✓ Guarantee security, scalability, and freedom from external risks
- ✓ Easily integrate learning into already existing corporate and academic processes

It's time to take a step into the new era of mobile distance education.
