

Unique Patented Technology for Delivering Ready-to-Use Multifunctional Native Mobile Apps and Digital Business Platforms for Android и iOS

The technology provides **complete digital independence** — from the creation of national social networks to niche business platforms for Android and iOS. The platform architecture flexibly adapts to any scenario. The solution is **protected by a patent and an international PCT application**, which confirms its uniqueness and opens up opportunities for **global licensing** and the formation of a new standard of digital sovereignty.

1. TECHNOLOGY DESCRIPTION

Personal "Rezvoy Mobile Software" is a unique patented technology ready for immediate use (active Russian patent + PCT application filed—Patent Cooperation Treaty, an international patenting procedure). It eliminates global barriers such as lengthy development times and high costs in creating fully functional, ready-to-use multifunctional native mobile apps and digital business platforms for Android and iOS of varying complexity and focus. This technology significantly accelerates the digital transformation of businesses and communities worldwide.

With our technology, you receive your own multifunctional native mobile app with a single entry point, ready for upload to the App Store and Google Play—without the need for custom long-term development.

The client's server is equipped with unique native mobile apps of varying functional complexity and focus, complete with a full management system for Android and iOS platforms.

2. KEY FEATURES OF THE TECHNOLOGY

- **Customizable by the client** to meet his specific requirements on their server in just one day.
- **Fully functional and ready to use**, but content-free — it is added by the customer
- **Arabic and multilingual support are available.**
- **Not a DIY builder or subscription-based SaaS service.**
- **Fully native mobile apps** with a self-contained backend on the client's server.
- **Operates without an internet connection.**

3. INFORMATION SECURITY

- **All data belongs to the client** and is stored on their server.
- **Administration and content updates** are performed via a secure web interface.
- **The solution is delivered** with a complete set of documentation and instructions.
- **The owner chooses** the system's deployment location.
- **Full control** over access and data protection.

4. UNIQUE FUNCTIONALITY

Our technology provides fundamentally new tools for organizing and structuring information. For example, the **AFRICA social network**, built using our technology, offers features unavailable on mainstream global platforms and messengers:

Unique Features of the "AFRICA" Social Network:

- **Community categories** allow users to manage multiple themes in one account and publish content in different languages.
- **Post catalogs:** Every post can be turned into an informational catalog with nested publications, creating a multi-layered data structure.
- **Delegated post management:** Authors can assign publication management to other participants (assistants).
- **Mini-apps and guides:** Create topic-specific mini-apps and reference materials within communities, with flexible navigation and structure.

5. MESSENGER INTEGRATION

Built-in messenger: Supports private and group chats, enabling the organization of communities, interest-based chats, educational classes, consultation rooms, and business channels.

The messenger is a key communication tool for the platform:

- Facilitates **group chats within categories**.
- Supports **private messaging, file sharing, voice messages, links, and interactive formats**.
- **Embedded in every thematic community**, turning it into a dynamic dialogue with feedback.

6. LEGAL STATUS

- **Active invention patent** in the Russian Federation.
- **International application filed** under the PCT (Patent Cooperation Treaty).

7. PROBLEMS SOLVED & OUR SOLUTION

Developing modern native mobile apps remains:

- **Expensive,**
- **Complex,**
- **Technically inaccessible** for small and medium businesses,
- **Time-consuming** (months or even years).

Our technology removes these barriers.

Now, any business—regardless of size—can obtain in just days:

- A **fully operational native mobile app** with a backend on their own server.
- An **interface tailored** to their industry.
- A **structure enabling content management, access rights, and user roles**.

Supported use cases for any digital business platform:

- **B2B social business platforms** for local or regional businesses.
- **Unified aggregators** for buying/selling/renting real estate.
- **Educational business platforms**, from school projects to national associations.
- **Task planners** for companies of any size and specific industries (healthcare, tourism, creative industries, sports, etc.).
- **Hybrid industry platforms** combining business functions, communication, and content.

8. IMPLEMENTATION EXAMPLES

Our technology has already powered several successful digital solutions deployed in record time:

- The world's first international thematic social network, "**AFRICA**" (Android/iOS).
- The international creative social ecosystem "**ZOOGALAXY**"—a digital community for animal-themed creativity (Android/iOS).
- A **social business platform**—Real Estate Sales Aggregator (Android/iOS).
- **Over 100 published mobile apps** on Google Play and the App Store, built using this technology.

CONCLUSION

The "**Rezvov Mobile Software**" technology is a revolutionary solution in the development of **multifunctional native mobile applications and digital business platforms** for **Android and iOS**, enabling the technical implementation of complex mobile projects **in just one day** and at a **fraction of the cost** of traditional methods.

This technology has the potential to **fundamentally transform access** to mobile digital tools for **business, education, territorial governance, and creative initiatives**—in **any country worldwide**.

A **powerful opportunity** now emerges for the global community, where **digitalization, mobile literacy, and entrepreneurship** demand **accessible and universal solutions**.

Our technology can serve as the foundation for:

- **National ecosystems of mobile platforms,**
- **Regional digital business aggregators,**
- **Industry-specific applications** with local and export-oriented features,
- **Advancing the digital economy** in the field of **multifunctional mobile apps and digital business platforms.**

The "**Rezvov Mobile Software**" is a revolutionary solution that paves the way for rapid and low-cost digital transformation, providing technology for successful development in an era of mobile dominance.
